

KARL SCHUKE BERLINER ORGELBAUWERKSTATT GMBH

## **solid state capture system**

After thorough testing in our shop we are proud to present **our own solid state capture system** for your organ. With many additional features and top-of-the-line hardware we are able to offer our system at a very attractive price. The system has been developed in collaboration with an internationally renowned partner from the German industry and features a modular design, which allows us to provide customized solutions for every organ.

- up to 4000 combination memory for small and mid-size organs
- modular setup with LED-indicators for each in- and output
- compact design, industrial standard, mounted in a steel-enclosure
- all standard features and a wide variety of customized features
- suitable for all stop actions (drawknobs, push-buttons, rocker switches, double (electric AND mechanic) action etc.)
- very attractive price incl. installation (please inquire)
